

TIGERS VAX NOW

HPV VACCINATION AMBASSADOR PROGRAM

Your Future, Your Decision.

Choose to protect yourself
from HPV and HPV cancers.

Get vaccinated against HPV.

HPV (human papillomavirus) is an extremely common virus in everyone—both women and men—that can cause cervical, oral and throat, anal, vaginal, vulvar, and penile cancers in adults—but HPV vaccination has been proven to prevent 90% of these cancers. HPV vaccination is a powerful tool for cancer prevention and offers protection today for a lifetime of HPV cancers.
