

Are you passionate about sharing information with others?
Are you interested in promoting cancer prevention?
Do you want to get involved in cancer prevention efforts on campus?

This opportunity may be for you!

Tigers VAX NOW HPV Vaccination Ambassador Program

is a new program at the University of Memphis. The program is looking for college students who are interested in becoming peer educators to promote HPV cancer prevention on campus and beyond.

In order to be considered, you must:

- » Complete the application form (link and QR code below)
- » Be a University of Memphis student between the age of 18 and 26
- » Be willing to attend six, one-hour training sessions (Thursdays at 6 pm from October 13 through November 17, 2022)
- » Be willing to complete evaluation surveys
- » Be willing to organize, conduct, and/or participate in campus events

If you are selected, you will receive:

- » HPV cancer prevention education training
- » Materials and resources needed for successful campus events
- » Valuable experience developing your peer education and communication skills
- » \$150 stipend for completing the program

If you are interested and have questions, please contact **Dr. Seokwon Jin**, University of Memphis at sjin1@memphis.edu or **Portia Knowlton**, St. Jude Children's Research Hospital at PreventHPV@stjude.org, or visit: stjude.org/tigers-vax
